OpenAI says its AI model 'went rogue': What do we know?

The system hacked into another company without being prompted by a human.

OpenAI is best known for its chatbot ChatGPT, which is used by hundreds of millions of people every week

OpenAI has revealed some of its most advanced AI models went rogue and hacked a start-up after it lost control of them during a security test.

The ChatGPT-maker said its agent - an AI system which can operate alone after human instruction – was being tested in a controlled environment but, after finding weaknesses, was able to escape the test limits.

They targeted Hugging Face, one of the world's largest hubs for sharing AI models, gaining access to some internal company systems.

OpenAI said the incident was "unprecedented", and it was conducting an investigation alongside Hugging Face, whose boss Clement Delangue said in a post on X it was "mind-blowing that all of this happened autonomously".

Elon Musk – Adopt AI or be left behind

Cybercrime Has Been Industrialized

Cybercrime now operates as a continuous, machine-speed industrial model, not episodic campaigns. Scale, automation, and reuse—not sophistication—define impact.

Evidence

640 Billion

reconnaissance events globally

121.99 Billion

exploitation attempts
+25% YoY

4.62 Billion

stealer logs circulating on darknet markets
+79% YoY

7,831

confirmed ransomware victims
+389% YoY

Key Insight

Security advantage is now defined by defensive velocity, not tool count, When attacks are AI-powered and run at machine speed, defense must move faster—or fall behind.

What challenges are customers facing?

The Broadest Platform in Cybersecurity

Secure Networking

- FortiGate**
NGFW with ASIC acceleration and industry leading Convergence
- FortiSwitch**
Protected Ethernet connectivity via Secure Networking convergence with FortiGate
- FortiAP**
Protected Wi-Fi connectivity via Secure Networking convergence with FortiGate
- FortiManager**
Centralized management of your Fortinet security infrastructure
- FortiNAC**
Visibility, access control and automated responses for all networked devices
- FortiExtender**
Extend scalable and resilient LTE and LAN connectivity
- FortiGate Cloud**
SaaS platform offering zero-touch deployment, network management and security analytics
- FortiEdge Cloud**
Cloud management for standalone LAN, WLAN and 5G gateway equipment
- FortiAIops**
AI based insights for rapid analysis and remediation of network issues
- FortiFone**
Robust IP phones and softclient to stay connected from anywhere
- FortiVoice**
Unified communications with secure voice, chat, conferencing, and fax
- FortiCamera**
Physical security with intelligent motion detection in any light condition
- FortiRecorder**
Secure NVR with smart AI analysis and centralized visibility
- FortiConverter**
Secure and automated firewall migration from a broad spectrum of vendors
- FGaaS**
Hardware as a service for FortiGate

Resources

- Product Matrix**
Specifications for top selling models
- Fortinet Brochure**
Highlighting our broad, integrated, and automated solutions, quarterly
- Free Training**
Fortinet is committed to training over 1 million people by 2025
- Free Assessment**
Perform an assessment in your network to validate your existing controls
- FortiOS**
The Heart of the Fortinet Security Fabric
- FortiCare**
Support and mitigation services

Unified SASE

SASE

- FortiGate SD-WAN**
Application-centric, scalable, and Secure SD-WAN with NGFW
- FortiClient EPP Agent**
Endpoint Protection Agent with AV, URL and Sand-box
- FortiClient ZTA Agent**
Remote access, application access, and risk reduction
- FortiSASE**
Cloud-delivered Security Services Edge
- FortiProxy**
Enforce internet compliance and granular application control
- FortiMonitor**
SaaS based DEM platform, performance monitoring
- FortiCASB**
Prevent misconfigurations of SaaS apps and meet compliance

CLOUD

- FortiGate VM**
NGFW w/ SOC acceleration and industry-leading secure SD-WAN
- FortiGate CNF**
Hosted cloud-native firewall for simplified cloud network security
- FortiWeb**
Prevent web application attacks against critical web assets
- FortiADC**
Application-aware intelligence for distribution of application traffic
- FortiGSLB**
Ensure business continuity during unexpected network downtime
- FortiDDoS**
Machine-learning quickly inspects traffic at layers 3, 4, and 7
- FortiFlex**
Flexible daily usage-based consumption licensing for a broad catalog of solution
- FortiPoints**
Simplified, flexible licensing for annual contracts, renewals, upgrades, and co-terms

AI-Powered FortiGuard Security

- WF** Web Filtering
- IPS** IPS
- AV** AV
- SBX** Sandbox
- IL MPS** IL MPS
- APP CTRL** Application Control
- ATTK SRFC** Attack Surface
- DLP** DLP
- OT** OT Security Services
- IoC** IoC
- IL CASB** IL CASB

Security Operations

- FortiAnalyzer**
Security Fabric log management, monitoring and response
- FortiMail**
AI-powered, protection against email-borne threats
- FortiSIEM**
Enterprise-wide monitoring, threat detection, and response
- FortiSandbox**
AI-powered real-time protection against unknown and 0-day threats
- FortiEDR/XDR**
Automated endpoint protection and correlated incident response
- FortiToken**
Cloud/HW/Mobile MFA provide passwordless adaptive authentication
- FortiSOAR**
Automated security operations, investigation, and response
- FortiAuthenticator**
Centralized identity and access management solution
- FortiNDR**
AI-driven analysis to detect and respond to threats
- FortiGuard MDR Service**
Managed threat detection, investigation, and response
- SOCaaS**
Continuous security monitoring, incident triage, and escalation
- FortiRecon**
Proactive digital risk protection service and external/internal threat monitoring
- IR Services**
Rapid detection, containment, and recovery of cyberattacks
- FortiPAM**
Privileged identity and access management, and session monitoring
- FortiDeceptor**
Active deception platform for early in-network attack detection and response
- FortiTester**
Network performance testing and breach attack simulation (BAS)
- FortiTrust Identity**
Identity and Access Management as a Service (IDaaS)
- FortiDevSec**
Orchestrated and automated continuous application security testing
- FortiGuest**
Access management solution for temporary access to guests and visitors
- FortiDAST**
Automated black-box dynamic application security testing
- FortiCNAPP**
Secure code to cloud with a single, data-driven platform
- FortiScanner Cloud**
Cyber Asset Attack Surface Management Service
- FortiDLP**
Endpoint DLP and Insider Risk management
- FortiAI**
Integrated GenAI Assist for SOC and NOC

OT Security Platform

- OT Security Service**
FortiGuard subscription for FortiGate NGFW enables protection against OT-specific threats
- Ruggedized Products**
Rugged NGFW, switch, AP, and 5G extenders provide secure connectivity in harsh outdoor environments
- FortiSRA**
Agentless secure remote access offers robust remote access control, management, session logging, monitoring, and recording
- SecOps for OT**
Advanced cybersecurity controls bring OT networks into the SOC and incident response plans

Open Ecosystem

- FNDN**
Advanced tools for Fortinet community to develop custom solutions
- Fabric Connectors**
Fortinet-developed integrations for automation and security
- Fabric API**
Partner-developed integrations for end-to-end visibility and protection
- DevOps Tools**
Community-driven scripts automate network/security tasks
- Extended Ecosystem**
Integrates with third-party systems and orgs for sharing threat-intel
