Leading banks in West Africa

Global insurance group

World's #2 telecom operator

Gulf's #1 retail group

Best airline in Western Europe

CERTIFIED

• ISO 27001

• SOC 2

• GDPR

Your systems run the rules. Our agents run everything else.

Nothing is replaced. Systems of record keep the structured work, Amantra.ai agents take the manual work around them, your people keep the judgement.

SYSTEMS OF RECORD

Run the structured work

Booked, posted, reported.

Record the transaction

Enforce the rules

Report the result

✓ ALREADY AUTOMATED

AMANTRA. AI AI AGENTS

Absorb the volume

The manual work around your systems, at any volume.

Read the documents

Fix the exceptions

Answer the questions

Chase the approvals

⚡ HIGH VOLUME · EVERY DAY

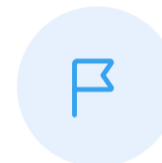

YOUR PEOPLE

Keep what matters

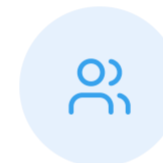

Decide, approve, override.

Judgement

Exceptions

Relationships

🧑 HUMAN IN THE LOOP

Amantra.ai AI agents absorb the volume. People keep the judgement, the exceptions and the relationships.

AI costs rise. Security is at risk. ROI gets questioned.

Three problems every CIO and CFO raises. RUSH was designed around them.

PROBLEM 01 · COST

The token meter never stops.

Every prompt, task and token adds cost. AI spend becomes hard to predict.

WHAT RUSH DOES

One fixed cost. No meter.

PROBLEM 02 · ROI

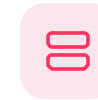

You spend more. But do you get more?

Usage costs rise. Business outcomes stay hard to prove.

WHAT RUSH DOES

Agents that finish the work.

PROBLEM 03 · SECURITY

Your trade secrets leave your walls.

Proprietary knowledge enters external AI systems. Your IP is exposed.

WHAT RUSH DOES

Nothing leaves the building.

Cost. ROI. Security. Get these three right and AI makes you more resilient.

AI agents, a model and the hardware. **One enterprise appliance.**

Governed AI agents on a Small Language Model tuned to your business, on hardware inside your building. Powered by PittsOS®.

Zero GPU costs

Zero token costs

Total data security

NOTHING LEAVES THE COMPANY · NOTHING LEAVES THE COUNTRY

Where RUSH agents go to work in financial services

Value pools by segment, with examples of the agents already in the RUSH Agent Marketplace. Ready to use blueprints, plug and play, on top of your systems.

Banking

EXAMPLES

Onboarding and KYC

Account Opening · KYC Onboarding · Verification

Lending and credit

Loan Application · Loan Document · Credit Risk

Fraud and AML

Fraud Detection · AML Monitoring · Transaction Monitoring

Payments and reporting

Payment Investigation · Dispute Resolution

Insurance

EXAMPLES

Quote and underwriting

Insurance Quote · Underwriting · Risk Assessment

Claims lifecycle

Claims

Intake · Claims Validation · Claims Severity

Claims fraud

Fraudulent Document Detection · Claims Document Extraction

Policy servicing

Policy QhA · Renewal · Claims Status · Policy Comparison

Financial services

EXAMPLES

Finance and reconciliation

Account Reconciliation · Bank Reconciliation · Payables

Risk and compliance

Regulatory Monitoring · Regulatory Filing · Due Diligence

Customer service

Complaint Handling · Ticket Triage · Multilingual Support

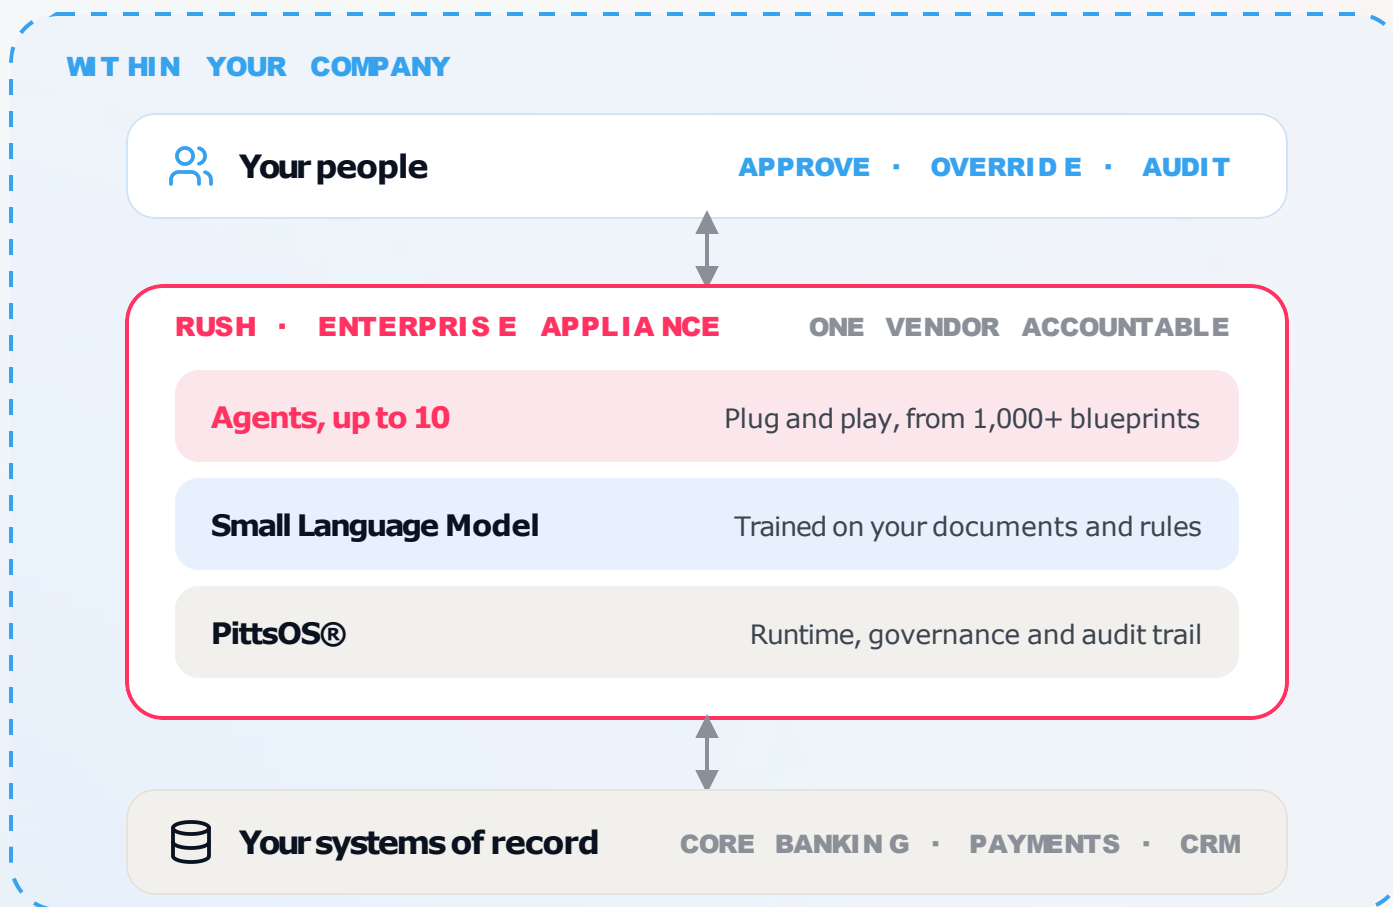

Cyber and IT security

Incident Response · Vulnerability Analysis · Agent Firewall

1,000+ pre built agents in five lanes: Financial services, Back office, Front office, Technology, Cross functional.

Three things you used to buy separately, **in one appliance**

Agents, model and hardware on one operating system, PittsOS®. Your people above it, your systems of record below it. **One vendor accountable for all of it.**

RUSH AGENT MARKETPLACE

1,000+ pre built agents

Blueprints for every department, plug and play. Pick up to 10 to run on your appliance.

✓ **Zero GPU costs**

✓ **Zero token costs**

✓ **Total data security**

PittsOS®: the operating system **inside RUSH**

The Small Language Model decides. PittsOS® acts. It runs the loop, enforces permissions, keeps memory on the appliance and logs every step.

WHAT PITTSOS® RUNS ON THE APPLIANCE

Runtime

Loop, state, retries, stops

Permissions

Enforced, not prompted

MCP and APIs

Your tools, exposed once

Memory

State, on the appliance

Retrieval

Your policies, cited

Multimodal

Documents, images, chat

Guardrails

Gates, thresholds, pause

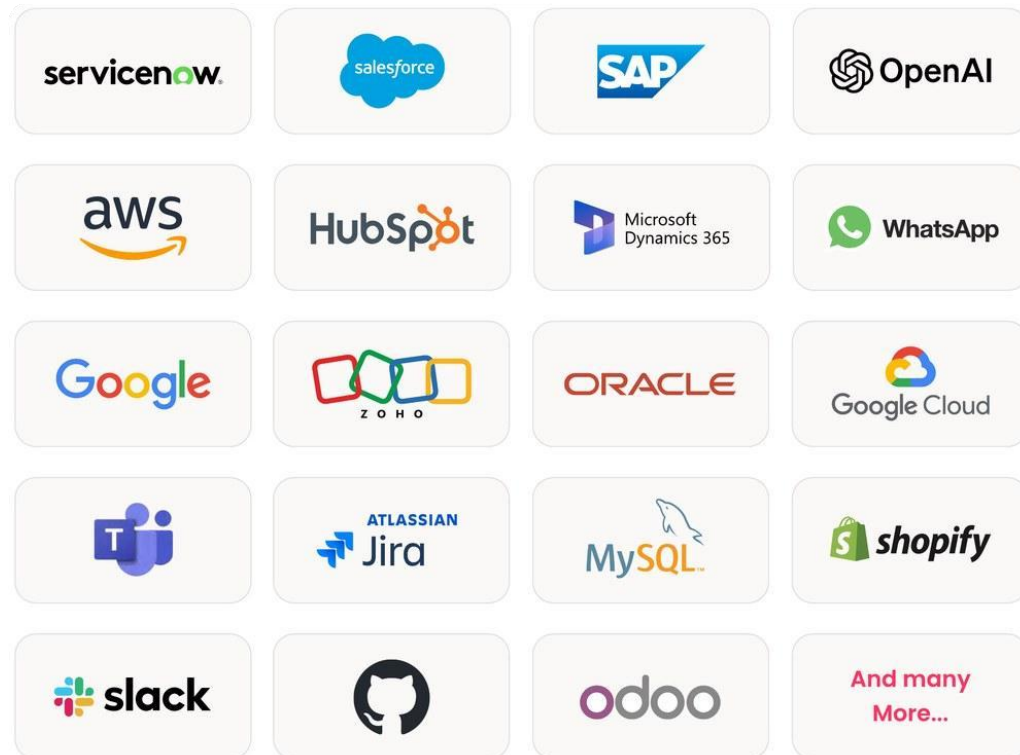

Audit trail

Every step, replayable

Highly integrated data connectors

Our AI agents work on top of your existing systems: core banking, payment switches, SAP, Oracle, Salesforce, ServiceNow etc. Nothing is replaced.

NATIVE CONNECTORS

PLUG AND PLAY

✦ Amantra.ai Platform

- REST APIs
- SOAP APIs
- GraphQL
- ODBC / JDBC
- ETL pipelines
- Kafka / Kinesis
- Streaming data
- ESB systems
- FTP / SFTP
- Digital agents

COTS (Commercial Off The Shelf) · Custom built · Legacy

Core platforms, ERP (Enterprise Resource Planning), CRM (Customer Relationship Management) and industry systems connect through APIs and database connectors, or **digital agents when no API exists.**

Every risk has a control. Every control is built in.

Built for enterprise AI oversight: clear principles and governance controls. Your people keep the judgement, the sign off and the off switch.

Grounded outputs

Every action cites its document, system record or policy clause

Permissions and gates

Agents act through existing system roles. Material actions stop at a named approver

Confidence thresholds

Below the floor, the agent hands over instead of guessing

Complete audit trail

Replayable record of every step for internal audit and regulators

Data sovereignty

Runs inside your company with an SLM (Small Language Model). No data leaves your perimeter

Pause and override

Any agent paused, rolled back or overridden by its owner

From order to live agents **in weeks, not months**

Four steps. Your team chooses and approves. Amantra.ai sizes, trains and delivers.

STEP 01

Choose

Up to 10 marketplace agents, matched to the work that costs you most.

YOUR TEAM

STEP 02

Scope

Amantra.ai certified engineers from CCTZ size the appliance to your volumes and systems.

CCTZ ENGINEERS

STEP 03

Train

The model learns your business inside your boundaries. Your data never leaves.

INSIDE YOUR WALLS

STEP 04

Run

Hardware deployed, agents live. The cost stays flat, month after month.

LIVE

ONE FIXED MONTHLY COST

No meter. Agents, model, hardware and support in one amount

Commercial details: please contact Computer Centre Tanzania (CCTZ)

• LIVE

Demo.

RUSH agents, running on the appliance.

Thank you.

One platform for every function, team and process. Proven in production before it scales.
