

FORFIN 2026

Let's Talk Modern and Secure Infrastructure

Nawaz Bagha

Why Are We Here?

Broadcom Created a Discussion

Market Disruption

Causing fundamental changes, not just product or pricing, but entire customer operating environments.

Customer Reaction

Customers are angry, budgets are blown, what risk lays ahead, renewal shock, strategic vendor concerns.

Strategic Trust

The entire conversation now requires trust and understanding their business impacts of staying with Broadcom... Or leaving Broadcom...

You:

Have used VMware software for 15+ years

Embedded knowledge

Support experience

Have integrated VMware with many other systems

Avoid the "Science Project"

Have no idea how hard or easy a migration is

Orphaned workloads are not an option

"My team is terrible at large projects"

x "Will I get fired?"

The VCF 9 Deadline is Coming!

By Broadcom

Complexity of Migration?

Use Existing Servers/Storage?

Lack of Innovation

Loss of Functionality?

Staff Training

Future Cost Increases

Fear of Service Disruption

Forced Deployment

Vendor Lock-in

Planning for Where You Want To Be

Three major shifts:

70%

AI is the New Normal

70% will deploy agentic AI by 2029*

AI has moved from experimentation to a boardroom mandate.

90%

App Modernization is Essential

By 2028, more than 90% of **new** applications will use **container technology***

Modern applications require cloud native platforms.

70%

Hybrid Cloud is Permanent

70% will operate platform-centric by 2028*

Cloud is an operating model that unifies every environment.

Top Concerns We Hear

Fear of Disruption and Downtime

Staff Training

Ecosystem Integration

Transformation Ready

Cost Management

Migration Complexity

How Nutanix can help

Alternative Virtualization

Full Stack Alternative

A Better Experience

Modern Workloads

End User Computing

Open Ecosystem

Cost Optimized Edge

Future Proof

The Nutanix Promise

Simplify Operations Without Sacrificing Choice

Simplicity  Choice

One Operating Model. Any Infrastructure. Any Cloud. Any Location.

Any App

Nutanix Prism & Nutanix Cloud Manager

Global IAM, Operations, Automation, Self-Service, Governance

**Nutanix
Unified
Storage**

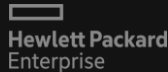

Nutanix Enterprise AI

Nutanix Kubernetes Platform
(incl. Nutanix Data Services for K8s)

**Nutanix
Database
Service**

Customer Journeys

**Run Better with
Modern
Infrastructure**

**Modernize Now
with Containers**

**Innovate Faster
with Agentic AI**

Use Cases

Private Cloud

Broadcom Migration

Resilient Cloud

Hybrid Cloud

Sovereign Cloud

Modern Edge

Transform with AI

Private Cloud Done Right

Customer Needs

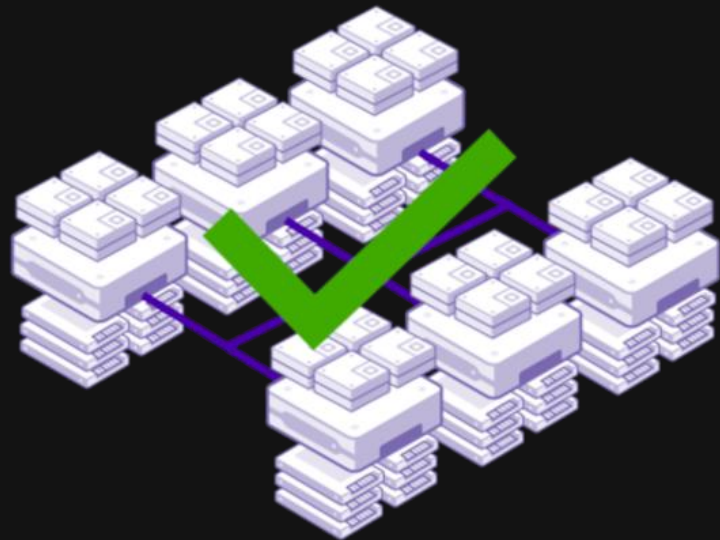

Cloud-like simplicity on-prem

Outcomes

Modernize legacy architecture

Achieve cloud-like agility

Accelerate key workloads

Modernize and Migrate without HW refresh

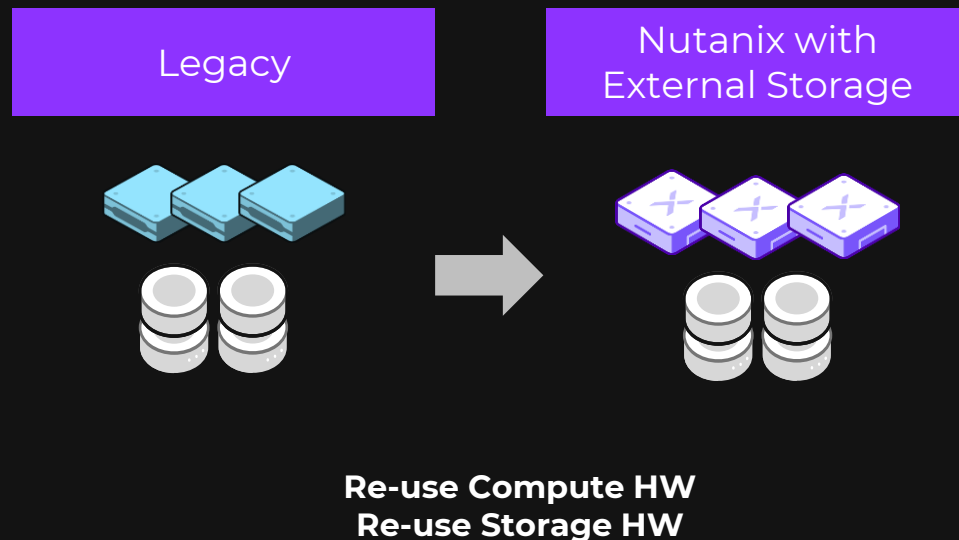

Customer Needs

Modernize virtualization but
preserve existing investments

Outcomes

Maximize use of existing
hardware

Simplify migrations

Protect Critical Workloads and Improve SLAs

Customer Needs

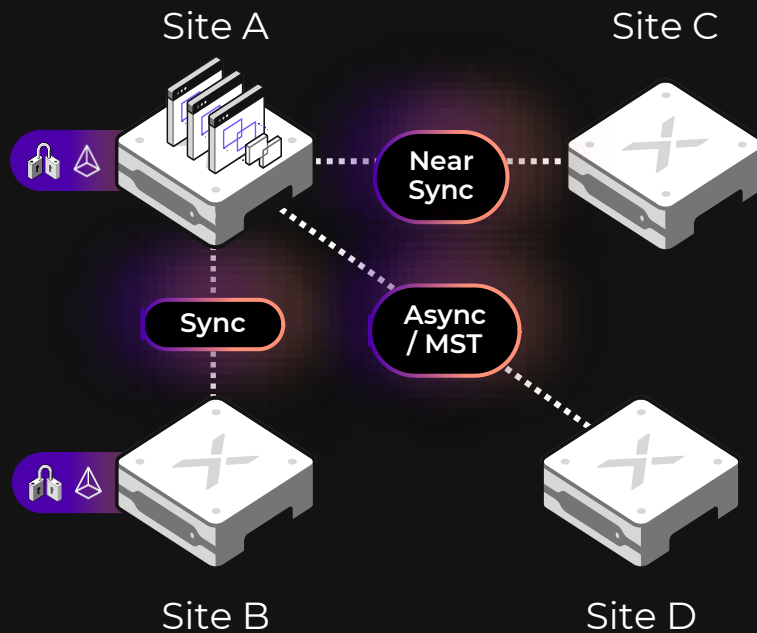

Business Continuity & Cyber
Resilience

Outcomes

Uptime for mission-critical
apps

Eliminated operational risk

Mitigate security risks

Anywhere (DC and Clouds)

The AI Ready Operating Model

Customer Needs

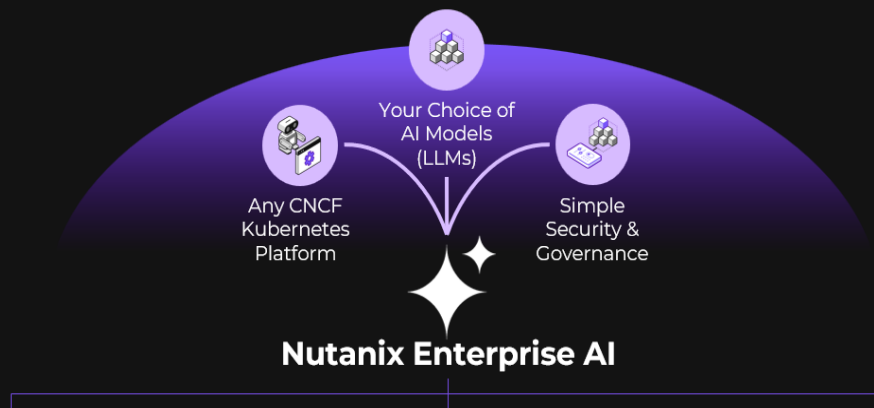

Operationalize AI with existing IT
operating model

Outcomes

Eliminate shadow-AI

Scalable AI infrastructure

Meet compliance, control &
governance requirements
