

OVERVIEW

TECHNOLOGY STACK

15 VENDORS · 4 PILLARS

01

NETWORK SECURITY,
AUTOMATION &
RESILIENCE

DDI, DNS Security & IPAM for
Resilient Network Management

Unified IT Observability &
Service Assurance

Agentless Vulnerability/Patch
Management & Configuration Audit

Network Management &
Configuration Solution

02

DATA PROTECTION

Advanced Screen Watermark &
Visual Data Security

Zero-Trust File Sharing & Content
Management for Secure Collaboration

IRM & Data Protection for Total
Document Control

03

IDENTITY & APPLICATION
SECURITY

API and AI Security Testing &
Protection Platform

Identity Access Management
(IAM,SSO,MFA) Solution

All-in-One Cybersecurity
Platform PAM, ZTN, Deception,
EDR & Email Security

04

SOC TOOLS & THREAT
OPERATIONS

Internet Exposure & Attack
Surface Intelligence
Platform (EASM)

Cyber Asset Attack Surface
Management & Visibility
Platform (CAASM)

Breach & Attack
Simulation for Cyber
Resilience (BAS)

EDR/EPP Solution for
Real-Time Threat
Detection & Response

AI-Powered Malware
Analysis & Threat Visibility

SECURE AND FEDERATED ENTERPRISE CONTENT MANAGEMENT

FILEORBIS – ZERO-TRUST FILE SHARING & CONTENT MANAGEMENT FOR SECURE COLLABORATION

SOLUTION HIGHLIGHTS

CONDUCT CONTENT AND SENSITIVE DATA ANALYSIS

Enforce security scans and controls.

FEDERATE DIFFERENT FILE SYSTEMS

Share your files with internal and external users.

DEPLOY ANYWHERE, UTILIZE EVERYWHERE

Deploy your applications and services across any environment and access them seamlessly from anywhere.

SOLUTION FEATURES

FILE SYSTEM MANAGER

MANAGE ALL YOUR FILE SYSTEMS WITHOUT MOVING THEM

ACCESS MANAGER

ACCESS ALL YOUR FILES FROM A SINGLE POINT

LINK MANAGER

SHARE YOUR FILES TO EXTERNAL USERS WITH VARIOUS PERMISSIONS

SECURITY MANAGER

INTEGRATE YOUR PROCESSES WITH ANTI-MALWARE, DLP, SANDBOX, CDR, ETC.

DATA GOVERNANCE MANAGER

ENSURE DATA MANAGEMENT FOR ALL FILES (DETECT, DISCOVER AND ENFORCE)

SOLUTION HIGHLIGHTS

UNIFIED RUNTIME
VISIBILITY:

Continuously discovers and inventories all AI and API assets including agents, MCP servers, LLMs, and vector stores providing full observability and uncovering hidden dependencies.

OFFENSIVE SECURITY
TESTING:

Dynamically tests AI and API applications for vulnerabilities such as prompt injection, tool abuse, collusion, and misconfigurations, ensuring only real risks are reported.

CONTINUOUS MONITORING
& COMPLIANCE:

Tracks drift, anomalies, and policy violations across all AI and API workflows, enforcing governance and protecting sensitive data while maintaining compliance with HIPAA, GDPR, PCI, and the AI Act.

HIGH-SIGNAL THREAT
DETECTION:

Detects validated threats across the AI mesh, from agent misuse to API exploitation, reducing false positives and enabling faster, precise responses.

SOLUTION FEATURES

SEE EVERYTHING.
SECURE EVERYTHING.

Complete Internet-Scale Visibility
with Censys

The Decision Window Has Collapsed

CrowdStrike 2026 Global Threat Report

Faster Response Is Not Enough

When decisions move at machine speed, weak
external context can accelerate the wrong decision.

IS IT EXPOSED?

Visibility

IS IT ACTIVE NOW?

Freshness

DOES IT MATTER?

Context

At Machine Speed, Confidence Becomes the Bottleneck

A Fast Wrong Decision Is Still Wrong

Illustrative SOC Workflow

Every SOC Decision Is Only as Good as the Context Feeding It

Trust Starts With Provenance

INTERNAL TELEMETRY

You Can Audit How It Is Produced

EDR · firewall · WAF · IPS
Configuration and collection are
inspectable inside your environment.

EXTERNAL INTELLIGENCE

You Must Evaluate How It Was Collected

Coverage, methodology and data age
must be understood before a decision
depends on them.

How Was This Collected – and by Whom?

Five Tests for Intelligence You Can Act On

The Challenge: Passing All Five – Consistently, at Internet Scale

Trust Starts With How the Internet Is Observed

Censys Internet Intelligence

First-party Internet intelligence built from direct observation, documented scanning methodology, and continuous refresh.

The data foundation behind the Censys Platform

IP HOSTS

DNS RECORDS

WEB ENTITIES

CERTIFICATES

Collection Methodology Is Part of the Security Decision

Three Measures That Matter

65,535

PORTS

Ongoing IPv4 scanning
across all ports

COMPLETENESS

92%

ACCURACY

Censys validation: 92%;
evaluated engines 10–68%

ACCURACY

16-24h

DISCOVERY

7-10 days

FRESHNESS

Three Decisions Security Teams Need to Make

OWNED EXPOSURE

Know
Yourself

What are we exposing?

Internet-facing IT · cloud
OT/ICS

Reduce blind spots

THREAT INFRASTRUCTURE

Know Your
Adversary

What are they using?

IPs · domains · certs
related infrastructure

Hunt with evidence

ECOSYSTEM RISK

Know Your
Friends

Who else is exposed?

Suppliers · partners
shared infrastructure

Coordinate action

How External Intelligence Enters the SOC

Internet Evidence → Trusted Context → Better Decisions

From One Signal to the Campaign

- 1 ONE SIGNAL
- 2 DURABLE TRAITS
- 3 RELATED INFRASTRUCTURE
- 4 TAILORED INTELLIGENCE

IP · DOMAIN
CERTIFICATE

Pivot on what attackers reuse

Shared traits expose the cluster

CAMPAIGN MAP
Map the broader
infrastructure footprint

TAILORED FEED
Track the adversaries
that matter to you

Move Beyond the IOC – Hunt the Infrastructure Behind It

AT MACHINE SPEED,

Trust Is the Advantage

See Censys Internet Intelligence

Bring an IP, domain, or exposure:
We'll show you what the Internet sees.
